

Chesapeake Weather Privacy Policy

Effective Date: September 18, 2026 | Website: chesapeake-weather.com

Introduction

Chesapeake Weather respects the privacy of visitors to chesapeake-weather.com. This policy explains what information the website collects automatically, why it is collected, how long it is retained, and how visitors can contact us with privacy questions.

The website is operated as a weather information and monitoring resource. The information described in this policy is limited to data generated through normal website requests and server operation.

Scope

This policy applies to visitors who access or use chesapeake-weather.com and its publicly available web pages. It addresses information collected through the website's IIS web server and does not describe information practices of unrelated third-party websites that may be reached through external links.

Server Logs & Cookies

No Cookies Used. Chesapeake Weather does not use cookies of any type on chesapeake-weather.com. The website also does not use web beacons, tracking pixels, or local storage for visitor tracking or targeted advertising. Because the site does not use cookies, it does not display a cookie-consent banner.

Web Server Logs. The website uses Microsoft IIS, which automatically records standard web-request information in server log files. This information is generated as part of normal operation of the web server.

Information Collected

The IIS server logs may contain the following standard request metadata:

- Connecting IP address
- Requested page or resource URL
- Date and time of the request
- Browser and user-agent information
- Device or client information contained in the user-agent/request
- HTTP response status code and related request information

This information is not collected through a visitor account or tracking profile. The site does not use these server logs to build advertising profiles or to sell visitor information.

Purpose and Use of Server Log Data

Server log information is used for legitimate operational purposes, including:

- Maintaining and securing the website and server infrastructure
- Detecting, investigating, and preventing unauthorized access, abuse, or cyber attacks

- Rate limiting and identifying excessive or malicious requests
- Diagnosing technical problems and system errors
- Monitoring website availability and performance
- Understanding basic request activity needed to operate and maintain the website

Chesapeake Weather does not use the IIS log data for targeted advertising.

Data Retention and Storage

Server log data is stored in the United States.

Standard IIS server log data is retained for **30 days**. After the applicable retention period, logs are routinely removed or otherwise purged according to the site's log-retention process.

Access to server logs is limited to authorized persons who have a legitimate operational or security need to access them.

Data Sharing and Disclosure

Chesapeake Weather does not sell or share server-log information for advertising or marketing purposes.

Server-log information may be accessed or disclosed when reasonably necessary to operate, secure, maintain, or troubleshoot the website and its infrastructure, or when required by applicable law, legal process, or a valid governmental request.

Security

Chesapeake Weather takes reasonable administrative and technical measures to protect server log information against unauthorized access, alteration, or disclosure. No internet-connected system can be guaranteed to be completely secure, but access to stored logs is restricted to authorized users with an operational need.

Your Privacy Requests

If you have questions about this Privacy Policy or want to inquire about information that may be associated with your visit, contact Chesapeake Weather at privacy@chesapeake-weather.com.

Because IIS logs are automatically generated technical records and are retained for only 30 days, a request concerning a particular visit may require sufficient information to identify the relevant request and must be made while the applicable log data is still retained.

Children's Privacy

Chesapeake Weather does not knowingly use its website to collect personal information from children. The website does not use cookies, user profiles, or targeted advertising.

Changes to This Privacy Policy

Chesapeake Weather may update this Privacy Policy when its website, server-log practices, or applicable legal requirements change. The effective date shown at the beginning of this policy will be updated when material changes are made.
